

Academy of Prosthodontics Annual Scientific Session Naples, Florida | May 3 – 6, 2023

Program Speaker – Sean Han

Title

Premium Modern Full Arch

Abstract

With the advancement of technology and methods and material science, we can be overwhelmed with many options for tackling full-arch treatment in 2023.

By reviewing the failures and shortcomings of my own journey of full-arch, we were able to come up with a protocol that is predictable and repeatable.

We will examine each step of the protocol from both clinical and laboratory perspectives and understand the importance of teamwork between the two.

Learning Objectives

1. Understanding the evolution of full arch planning and conversion process
2. Importance of communication between Clinical and Laboratory team
3. Predictable and repeatable esthetic final

Biography

Passionate Dental Technologist on a mission to transform as many patients' lives as possible using the most up-to-date proven technology, materials and protocols to use the "golden time" to give the ultimate experience of the patient and results.

Master Ceramist and Entrepreneur with 20+ years experience successfully launching and lead operating both a high-end production and premium major case dental laboratories in the United States.

Continually developing, implementing and training dental laboratories and clinics- the innovative and digitally advanced protocols to increase efficiency, predictable consistent results and premium dental prostheses.
