

Academy of Prosthodontics 2024 Annual Scientific Session Four Seasons Hotel, Denver, Colorado May 29 – June 1, 2024

Program Speaker – Joseph Kan

Title

Immediate Tooth Replacement: Lessons Learned from 27 Years

Abstract

Achieving anterior implant esthetics is a challenging and demanding procedure. To create implant restorations with harmonious gingival contour that emulate nature is a fusion of science and art. Understanding the biologic and physiologic limitations of the soft and hard tissue will facilitate predictability in simple to complex esthetic situations.

This presentation will focus on Current implant treatment philosophies and methodologies for replacing missing teeth in the esthetic zone. Emphasis will be placed on diagnosis and treatment planning, surgical and prosthetic management of soft and hard tissue.

Learning Objectives

1. Identify prognostic variables for predictable immediate implant in extraction socket.
2. Concepts for Bone and gingival grafts for immediate tooth replacement.
3. Complications management.

Biography

JOSEPH KAN

Dr. Kan completed Prosthodontics and Implantology from Loma Linda University. He is a professor and maintains a private practice.
