

Academy of Prosthodontics 2024 Annual Scientific Session Four Seasons Hotel, Denver, Colorado May 29 – June 1, 2024

Program Speaker – William Martin

Title

Edentulous Esthetic Risk Assessment for Full Arch Scenarios

Abstract

The rehabilitation of the full-arch patient is met with a wide range of diagnostic intra- and extra-oral risk factors that can be impacted by the type of the restoration and the clinician's approach to care. This presentation will introduce a patient pre-treatment assessment table designed to identify and minimize the potential risk of esthetic complications (in addition to mechanical and technical) in the long-term restoration. The Edentulous Esthetic Risk Assessment (EERA) table highlights six critical risk factors that can have a positive or negative impact pending the restorative approach to rehabilitation. Participants will be guided using this assessment table specific to a planned restoration, highlighting the pros and cons of the treatment approach when addressing patient risk factors.

Learning Objectives

1. Define prosthetic volume as it relates to implant supported/assisted restorations for the rehabilitation of the full arch.
2. Detail pretreatment esthetic analysis in the full arch patient and identify important risk factors that can have influence on treatment outcomes.
3. To be able to apply the edentulous esthetic risk analysis in the evaluation of patients desiring a fixed or removable implant solution in the rehabilitation of a full arch.

Biography

WILLIAM MARTIN, DMD, MS, FACP

Will Martin, DMD, MS, FACP is a Clinical Professor in the Department of Oral and Maxillofacial Surgery at the University of Florida's College of Dentistry. He received his DMD from the University of Florida and completed his MS and Certificate in Prosthodontics from Baylor College of Dentistry. Dr. Martin joined the faculty at the University of Florida in 1999 and currently serves as the Director of the Center for Implant Dentistry. Dr. Martin is a Diplomate of the American Board of Prosthodontics and a fellow of the American College of Prosthodontists, International Team for Implantology and Associate Fellow of the Academy of Prosthodontics. Dr. Martin has authored numerous peer-reviewed scientific articles and abstracts. He has co-authored several textbooks on implant dentistry, specifically the ITI Treatment Guides Vol. 1 and 10, S.A.C. Classification in Implant Dentistry (1st Edition) and most recently the 2nd Edition. He lectures both nationally and internationally on esthetic and implant dentistry.
