Program Speaker – Dr. Jennifer Wiens Priebe

Title

Advances in Diagnostic Imaging of the Temporomandibular Joints

Abstract

As prosthodontists, we are faced with clinical situations where diagnostic imaging of the Temporomandibular Joints (TMJs) can be helpful in managing patient care. This presentation will discuss the historical as well as current methods of imaging the TMJs along with their advantages and disadvantages. Recent developments in TMJ imaging will be discussed relative to exposure, accuracy, cost, time, convenience, patient preference and efficacy.

Learning Objectives

1. To understand the different imaging modalities of the Temporomandibular Joints.
2. To acknowledge the new and updated combined imaging that is now available.
3. To learn the application of each imaging modality and know when it is appropriate to use them.

Biography

DR. JENNIFER WIENS PRIEBE
Dr. Priebe is a Diplomate of the American Board of Prosthodontics and in a prosthodontic private practice in Michigan. She is also on staff at Beaumont Hospital, Royal Oak, MI in the Ian T. Jackson Craniofacial Cleft Palate Clinic. She is a Director of Educational Programs for Private Practitioners for Career Design in Dentistry, and participates as faculty for Future Leaders in Prosthodontics workshops. She was a part-time instructor at The University of Detroit Mercy School of Dentistry from 2011-2014.
