

Academy of Prosthodontics 2015 Annual Meeting

Presenter:

Dr. Joanne N. Walton, DDS, Dip. Pros., FRCD(C)

Professor of Prosthodontics
Faculty of Dentistry
University of British Columbia (UBC)
Vancouver, Canada

Presentation Title:

Who's in 1st, What's in 2nd, I Don't Know's in 3rd... Getting a handle on the curriculum

Abstract:

Do you *really* know what's in your curriculum? Keeping curriculum information current and accessible is a huge challenge for most dental schools. And then there's the issue of timetabling all that content (including rotations!) while allowing for real-time updates. At UBC Dentistry, we developed a curriculum database, dubbed "OSCAR", to both document and schedule our dental, graduate and dental hygiene curricula. OSCAR provides a range of information from accreditation reports to individual timetables, from reminders to resources, and can be updated on-the-fly by both faculty and staff. This presentation will provide an overview of the rationale, development, functions, and future of OSCAR.

Objectives:

Describe the rationale, development and functions of a curriculum database and apply lessons learned to your own programs.

Conflict of Interest Statement:

I affirm that I have no involvement in any entity that has an interest, financial or otherwise, in the subject matter or materials discussed in this presentation.
